CampusOS Demo University
Academic Handbook 2026-27 (Version 1.2)

This handbook sets out the academic regulations for undergraduate programmes at CampusOS Demo University. It is a fictional document created for demonstrating retrieval-augmented generation with page-level citations.

Contents

Section 1 - Attendance Policy (page 2)
Section 2 - Grading and Evaluation (page 3)
Section 3 - Course Prerequisites (page 4)
Section 4 - Academic Integrity (page 5)
Section 5 - Examinations and Re-evaluation (page 6)
Section 6 - Internships and Credit Transfer (page 7)

Section 1 - Attendance Policy

1.1 Minimum attendance. Students must attend at least 75 percent of the scheduled lectures, tutorials and laboratory sessions in each course to be eligible to sit the end-semester examination.

1.2 Condonation. The Head of Department may condone a shortfall of up to 10 percentage points (that is, attendance between 65 and 75 percent) for documented medical reasons or approved university representation. Condonation requests must be submitted within 7 days of the absence ending.

1.3 Consequences. A student whose attendance remains below the required threshold after any condonation is debarred from the end-semester examination in that course and receives an "I" (incomplete) grade, which must be cleared by re-registering for the course.

1.4 Recording. Attendance is recorded by the course instructor and published on the student portal every two weeks. Discrepancies must be reported to the instructor within 5 working days of publication.

Section 2 - Grading and Evaluation

2.1 Grading scale. Performance is reported on a 10-point scale: O (10), A+ (9), A (8), B+ (7), B (6), C (5), P (4) and F (0). A grade of P or above is a pass.

2.2 Assessment weighting. Unless the course outline states otherwise, continuous internal assessment contributes 40 percent and the end-semester examination contributes 60 percent of the final course mark.

2.3 CGPA. The Cumulative Grade Point Average (CGPA) is the credit-weighted mean of grade points across all completed courses. CGPA is rounded to two decimal places.

2.4 Grade improvement. A student may re-register for at most two passed courses during the programme to improve a grade. The better of the two grades is used to compute the CGPA.

2.5 Academic probation. A student whose semester GPA falls below 5.0 is placed on academic probation for the following semester and must meet an academic advisor at least twice during that semester.

Section 3 - Course Prerequisites

3.1 General rule. A student may register for a course only after passing all of its listed prerequisites, unless the instructor grants a written waiver.

3.2 Computer science prerequisites.
CS 101 Programming Fundamentals - no prerequisite.
CS 201 Data Structures - requires CS 101.
CS 210 Design and Analysis of Algorithms - requires CS 201 and MATH 120 Discrete Mathematics. The recommended textbook is Introduction to Algorithms by Cormen, Leiserson, Rivest and Stein.
CS 340 Artificial Intelligence - requires CS 210.
CS 345 Machine Learning - requires CS 210, MATH 210 Linear Algebra and MATH 220 Probability and Statistics.

3.3 AI Workshop Series prerequisite. Participation in the AI Workshop Series (including hands-on agent and machine learning workshops) requires completion of CS 210 Design and Analysis of Algorithms, or concurrent enrolment in CS 210, together with working knowledge of Python. Workshop organisers may verify prerequisites at registration.

3.4 Waivers. Prerequisite waivers must be requested from the course instructor before the add/drop deadline and are recorded on the student portal.

Section 4 - Academic Integrity

4.1 Principle. All submitted work must be the student's own and must acknowledge every source used, including code, data and text.

4.2 Plagiarism. Copying work from another student, a website or a code repository without attribution is plagiarism. Similarity reports may be used as evidence but are not by themselves proof of misconduct.

4.3 Generative AI tools. Students may use generative AI tools only when the course instructor explicitly permits them for a specific assessment. Any permitted use must be disclosed in a short statement describing the tool and how it was used. Undisclosed use is treated as academic misconduct.

4.4 Penalties. A first confirmed offence results in a zero mark for the affected assessment. A second confirmed offence results in an F grade in the course. A third offence is referred to the University Disciplinary Committee.

4.5 Appeals. A student may appeal an academic integrity decision to the Dean of Academics within 10 working days of being notified.

Section 5 - Examinations and Re-evaluation

5.1 Examination schedule. End-semester examinations are held in the final two weeks of each semester. The schedule is published at least four weeks in advance.

5.2 Missed examinations. A student who misses an end-semester examination for a documented medical emergency may apply for a make-up examination within 3 working days of the missed examination.

5.3 Re-evaluation. A student may request re-evaluation of an end-semester answer script within 7 days of the publication of results. The re-evaluation fee is Rs. 500 per course and is refunded if the grade changes.

5.4 Outcome. The re-evaluated mark replaces the original mark whether it is higher or lower. Re-evaluation decisions are final.

Section 6 - Internships and Credit Transfer

6.1 Summer internship credit. A summer internship of at least 6 weeks may be registered for 2 credits with prior approval from the department internship coordinator. Students must submit a report and a supervisor evaluation within 3 weeks of completing the internship.

6.2 Eligibility. Students must have a CGPA of at least 6.0 and no pending F grades to register an internship for credit.

6.3 Online course credit transfer. Credits earned from approved online courses (MOOCs) may be transferred up to a maximum of 20 percent of the total programme credits. Transfer requests require the course certificate and a mapping approved by the Board of Studies.
